**DETAILED ACTION**

This action is responsive to the amendment filed 10-31-2007, which has been entered.

Claims 2-24 are allowed.

***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a system and a method, as set forth in claims 2, 11 and 17, and most significantly a pulley having an optical part thereon such that the pulley rotates to control the a position of the optical part relative to an optical axis, and a belt redirecting mechanism holding the belt around d frictional surface of the pulley so as to redirect the belt furthest from the beam of light along the optical axis, set fort in claim 1; the method of claims 11 and 17, requires a motor connect to a rotatable device via a belt to rotate the rotatable device so that different part of the rotatable device is in the part of the optical source (light beam set forth in claim 17). Wherein the belt is position at a position of rotation furthest from the optical source; such that the belt engaging the pulley at the second side surface of the belt and away from the light source/light beam so as to prevent the light source from affecting the belt is not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
